

## **Gabriel® Commercial Vehicle Fact Sheet**

---

*ArvinMeritor offers Gabriel shocks in the Commercial Vehicle Aftermarket as both direct OE replacement shocks and versatile application replacement shocks.*

### **Fleetline Heavy Truck Shocks**

Fleetline shocks are designed as a direct OE replacement shock. Design advantage over the original equipment product is an enhanced valving rate to compensate for initial suspension softening.

OE Design Features Include:

- Pressurized piston ring
- Multi-lip piston seal
- Independent compression and refill ports
- 360-degree end mount weld
- Cold formed and welded eye ring end mounts
- Hydraulic rebound stop
- One and three-eighth bore and one and five-eighth bore designs

### **GasSLX Heavy Truck Shocks**

The Gabriel GasSLX shock is designed to be the versatile upgrade option for multiple application needs.

Upgrade Features Include:

- High temperature fluid
- Three-stage viton piston rod seal
- Silicon coated spring valving
- Gas cell technology
- Three-way adjustable, Regular-Firm-Extra Firm

### **Fleetline Cab Shocks**

Gabriel takes the Cab shock design one step further by offering the first Gas-Cell cab shock, increasing rider comfort.

Upgrade Features Include:

- Gas cell technology – reducing fade, increasing rider comfort
- Bulged body design – increasing cooling area
- Larger bore design for additional durability
