

## Remanufactured Products

---

ArvinMeritor's Commercial Vehicle Aftermarket (CVA) business remanufactures its products rather than simply rebuilding them. If a part is worn, CVA replaces it with a selection of brand-new genuine parts. All remanufactured products are high quality and are offered below the cost of a complete new unit.

ArvinMeritor CVA follows tough remanufacturing standards and a thorough inspection process for all of its reman products. First, critical or damaged parts are discarded and replaced with genuine, new parts. Then, they put the remaining parts through their toughest tests. Magnafluxing checks for cracks, stress and fatigue points. Dimensional quality control testing ensures that every part meets strict specifications for optimum performance. And, load testing simulates actual road conditions and ensures products meet strict OEM new production standards. All products are backed by a one-year remanufacturing warranty.

CVA remanufactures products in its two dedicated facilities, utilizing the same equipment and manufacturing processes as its original equipment. The remanufacturing facilities are in Brampton, Ont., Canada and Plainfield, Ind., U.S.

Plainfield, Ind., is QS-9000 certified and environmentally focused. The site utilizes top-notch remanufacturing processes to ensure high-quality parts. It features the latest equipment such as belt conveyor aqueous washers, a tumble washer, media shakers, burn-off oven, tumble blast, spinner machines and sandblasting. The facility also has multiple coining presses, presses for disassembly and assembly and machining for grinding, milling, drilling, welding and more. All remanufacturing and testing is on site.

ArvinMeritor CVA supplies remanufactured parts under the Meritor and Euclid brand names. Meritor product offerings include:

- Axle Carriers
- Brakes shoes
- Clutches
- Transmissions
- Lucas A2LS cylinders

Euclid product offerings include:

- Brake shoes
- Calipers
- Hydraulic brake cylinders
- Air compressors
- Valves
- Starters/Alternators
- Air dryers and cartridges
- Water pumps
