

Your Vision. Our Innovation.

The sky's the limit with ArvinMeritor's large roof-opening systems. Designed with consumer comfort in mind, the system features multiple glass panels and a side-guided roller blind that deliver a near-convertible sensation without sacrificing acoustics and styling. An integrated beam for energy absorption and electric anti-squeeze technology further enhance passenger safety. This is just one more example of how ArvinMeritor is able to blend style and safety into solutions that move the world.
